

# AGRIWATER

**Innovative and Sustainable Measures of Keeping Water in the Agricultural Landscape**

Starting in October 2020 and scheduled to run until September 2022, AGRIWATER is a project funded by the Erasmus+ Programme of the European Union under key action 2: Cooperation for Innovation and the Exchange of Good Practice.

## PROJECT OBJECTIVES:

Educate farmers and landowners in innovative climate change & drought adaptation

1

Help farmers implement drought adaptation measures to maintain their agricultural lands

2

Raise awareness among farmers and landowners on why it is necessary to take care of their lands

3

An educational platform will be created where farmers and landowners can gain knowledge on the practical implementation of different adaptation strategies and water management systems which they can then use on their own land to better cope with droughts.
