WP1

Task 1.1 State of the Art (UNITO), M1 – M6

To collect the information about the state of the art, UNITO created online databases storing all relevant research. The database was created in the FIELDS project *management platform* and it will be available through the project's *public website*.

Task 1.2: Stakeholders strategic mapping (LLL-P), M1- M6

LLL-P and EfVET will aggregate an agriculture, forestry and bio-economy education and VET providers' list. All partners will contribute comprehensive information to LLL-P to feed the list. The database will register and index the providers with their activities, certification, curricula, interest for collaboration, search for partners, language and place.

A target of 30 institutes to populate the platform is set for year one and a target of minimum 120 is set until the end of the project.

FIELDS HAS BEEN APPROVED!!

Submitted by *Alessandro Sopegno* on Thu, 08/22/2019 - 09:17

There are new challenges and opportunities for agriculture today, driven by the climate change, the greening of the products and processes, the reuse of side-stream products, the raised complexity of the chain and the increased availability of information. However, to successfully address and react to these drivers, agriculture and forestry needs new business models and skills. The identification of existing and emerging skills

Dear Partners,

Thank you for expressing your preference about the suggested dates for the next FIELDS meeting in Slovenia.

Considering the doodle calendar, 32 out of 95 of you selected the following dates:

From Monday 29 at 13:00 to Tuesday 30 June 2020 at 13:00.

I would like to thank in advance the colleagues of GZS for their availability and hospitality.

Kind regards
Francesca
